Strengths of the URClearED solution

air traffic awareness
situational awareness
awareness
situational awarness

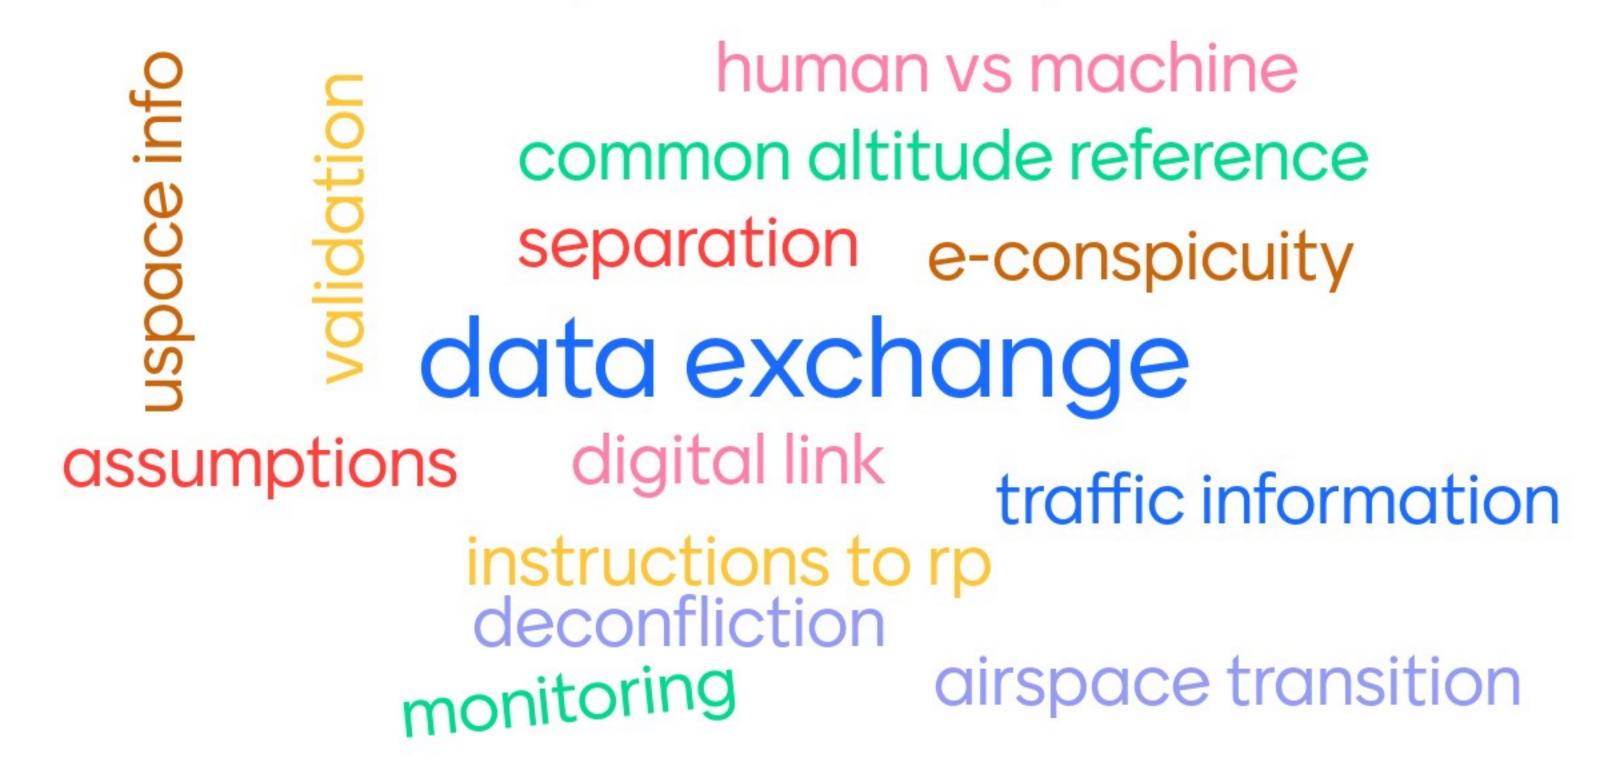

Risks introduced with the URClearED solution

impacted capacity uncoordinatedresponses mid air collis rp induced disconnect with atm is voice based workload confusion in large ace is digital disconnect with u-space lower safety controller disruption digital only roles responsibility misunderstanding selestration provision new responsibilities

Interaction with U-space services

service provision clarity

Interaction with ATC Safety Nets

within present regulation

should be no interaction airspace capacity

tactical deconfliction airspace classes

collision avoidance

u-space

separation being digital

avoid overlap

rules of giving way

digital robust

safety

rwcalertrate

connection lost

seamless integration rpas performance

within present procedures
